

I cannot begin to tell you how offended I am by the decision of Sinclair Broadcasting to require their stations to air an anti-Kerry documentary days before the election. This program is clearly political. It is not a news analysis. It has no business being passed off as one.

It is my understanding that the FCC exists to protect the American public from this kind of blatant abuse of the public air waves. You have recently imposed heavy fines for showing the public what you consider indecent images. Nothing is as corrupt or indecent about showing this anti-Kerry supposed documentary at this time.

I urge you in the strongest possible way to prevent this disservice to the American people.
